An emergency can develop from a number of causes, if it happened in your workplace... Would you know what to do????

We provide a number of different training programs to help you, not only be prepared in the case of an emergency, but also how to deal with one.

First Attack – Designed to familiarize your staff with the types of extinguishers available, how to identify them and how to use them.

Fire Warden – Providing the participants with the skills and knowledge to perform the duties of the various roles required within an EPC

Evacuation Audit – Test the procedures put in place with a site evacuation and audit to ensure that arrangements are effective in an emergency situation.

All training is designed to meet the requirements of AS3745, and all participants will be provided with a certificate of completion for the training they have completed.

For more information please give our helpful sales team a call.
